

## **MAJOR HIGHLIGHTS**

**Description:** A variety of methods, techniques, materials, and philosophies will challenge you to express yourself. As you develop in art and design, you will become visually literate, skilled in creative problem solving, and aesthetically sensitive.

**Curriculum:** A rich foundation of introductory art and design courses, followed by guided curriculum in either art or design. If you are interested in teaching licensure, you will be advised through the necessary curriculum.

**Study abroad opportunities:** You can easily include a study abroad experience during your second or third year. If you are focusing on design, you may also choose to complete a study away experience in Hollywood, California at Gnomon School of Visual Effects to learn from industry professionals.

**Fieldwork experience:** You will have the option to take part in independent studies and research opportunities. Internships are required for those concentrating in Design.
